

University of Liege,

February 2, 2016

Dear Colleagues, Dear Friends,

This year the 17<sup>th</sup> International Conference on Photosynthesis Research will be held in Maastricht, the Netherlands, from 7<sup>th</sup> to 12<sup>th</sup> August. In connection with this meeting, we are organizing a satellite meeting on ‘Photosynthetic and Respiratory complexes, from structure to function’ from 13<sup>th</sup> to 16<sup>th</sup> August. The venue will be in Verviers, a city which is easily accessible (less than an hour by car or train) from Maastricht or from Zaventem-Brussels Airport.

We plan to hold a meeting that, in addition to talks by senior speakers, will have space for junior scientists to present their work (short talks). The cost of the meeting will be around 250 € per person, including all meals. Information on accommodation and venue is given on the website of the meeting : <http://events.ulg.ac.be/prcsf2016/>

We will also publish a special issue on “Photosynthetic and respiratory electron and proton transport in plants and algae; operation, regulation, structure and function” in *Physiologia Plantarum*. The deadline for submission of manuscripts is the 1st of October 2016. Participants who wish to contribute to this special issue should indicate this when submitting their abstracts.

With best wishes,

Pierre Cardol & Egbert Boekema
